Applicable Standards

1. GRI Standards

2. International Standard on Assurance Engagements 3000 (Revised) (ISAE 3000 (revised))
3. Usage of Waters and Papers Calculation Procedure (TSUNEISHI HOLDINGS CORPORATION)

(Applied quantification methodology)

4. GRI 3(Material topics), GRI 301(Materials) and GRI 303(Water and Effluents)

Responsibility for the management of sustainable data

The Applicant is responsible for preparing the Report for sustainable data and for maintaining effective internal controls over the data and information disclosed. The Society is responsible for carrying out the verification engagement in the Report for sustainable data in accordance with the contract made with the Applicant. It is the Applicant who, in the final instance, will approve the Report for sustainable data and it will continue to remain under the Applicant's responsibility.

Verification Procedure

Verification by the Society has been carried out in accordance with "GRI Standards" and "ISAE 3000(revised)" to ensure that the applicant's calculation engagements were correctly quantified through appropriate monitoring and calculations.

To form a conclusion, the verification engagement was undertaken using a sampling technique through the following process:

- Site visit to the Applicant's Head office and its affiliates
- Interview with the key personnel responsible for aggregating the usage of Waters and Papers, information management, and preparation for the Report of sustainable data
- Verification of the integrity of the information sources available at the visited sites and aggregation in the Head Office for Waters, Papers, and information included in the sustainable data
- Review of the management system for the sustainable data
- Confirmation of QA/QC system and double-check system during data entry

Level of Assurance and Materiality

The verification opinion declared in this Verification Statement was determined based on a limited level of assurance, which set the materiality at the professional judgment of the verifier.

Verification Opinion

<Unmodified opinion>

Based on our verification engagement, nothing has come to our attention that causes us to believe that the Applicant is not in accordance with the applicable standards and that the selected quantification methodology and the Report for sustainable data are not materially correct. Further, there is no conflict of interest between the Society and the Applicant.

Summary of Waters and Papers Usage

Verified usage	2023
Waters usage (total)	1,752,729 m ³
Papers usage (A4 basis)	26,033,554 sheets
